This is Vesta:

Welcome home

Vesta is more than a name, it is a symbol of vision, growth, and possibility. Born from the idea of home, Vesta represents the place where the future is built, protected and set in motion. A place where companies don't simply exist, they thrive.

As a strategic partner Vesta connects businesses to opportunity through a key presence across Mexico and direct access to the United States by air, sea and land. Its strength lies not only in infrastructure and reach, but in a culture driven by excellence, innovation and an unwavering obsession for customer success.

Vesta's purpose is bold: to transform Mexico's industrial platform into a modern, competitive and dynamic environment that attracts high-level investment and unlocks new opportunities.

Every development is built with intention: to spark innovation, strengthen communities and create lasting value.

Because when a company grows, grows extends far beyond business. People grow. Communities grow. Mexico grows.

Vesta is more than a destination for industry.

Vesta is where the future grows

Where growth feels like home

Growth doesn't happen by chance, it happens in the right place.

Vesta’s 23 industrial parks are more than locations, they are ecosystems designed for businesses to evolve, expand and thrive. Strategically located and carefully planned, each park meets the demands of a constantly changing market.

At Vesta, companies don’t just set up operations, they build a purposeful presence. With strong connectivity, modern infrastructure and a supportive business environment, they gain the tools and confidence to move forward.

Vesta parks combine everything that drives success:

Accessibility

Efficiency

Flexibility

Community

Whether entering a new region or scaling to new heights, companies find the foundation they need to grow.

Because growth is not only about space, it is about the environment that make it possible.

This is Vesta, where companies grow.

Regions

North Bajío

North East

North West

Central

South Bajío

North Bajío

Innovation Meets Industry

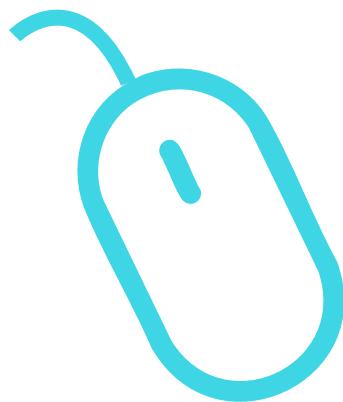

North Bajío brings together technology, innovation and advanced manufacturing. The region has become an important destination for companies looking to develop sophisticated operations supported by engineering talent, universities, research capabilities and a diversified industrial base. Its strength in automotive, electronics, technology and advanced manufacturing creates opportunities not only for production, but also for companies seeking to incorporate greater technological capabilities into their operations.

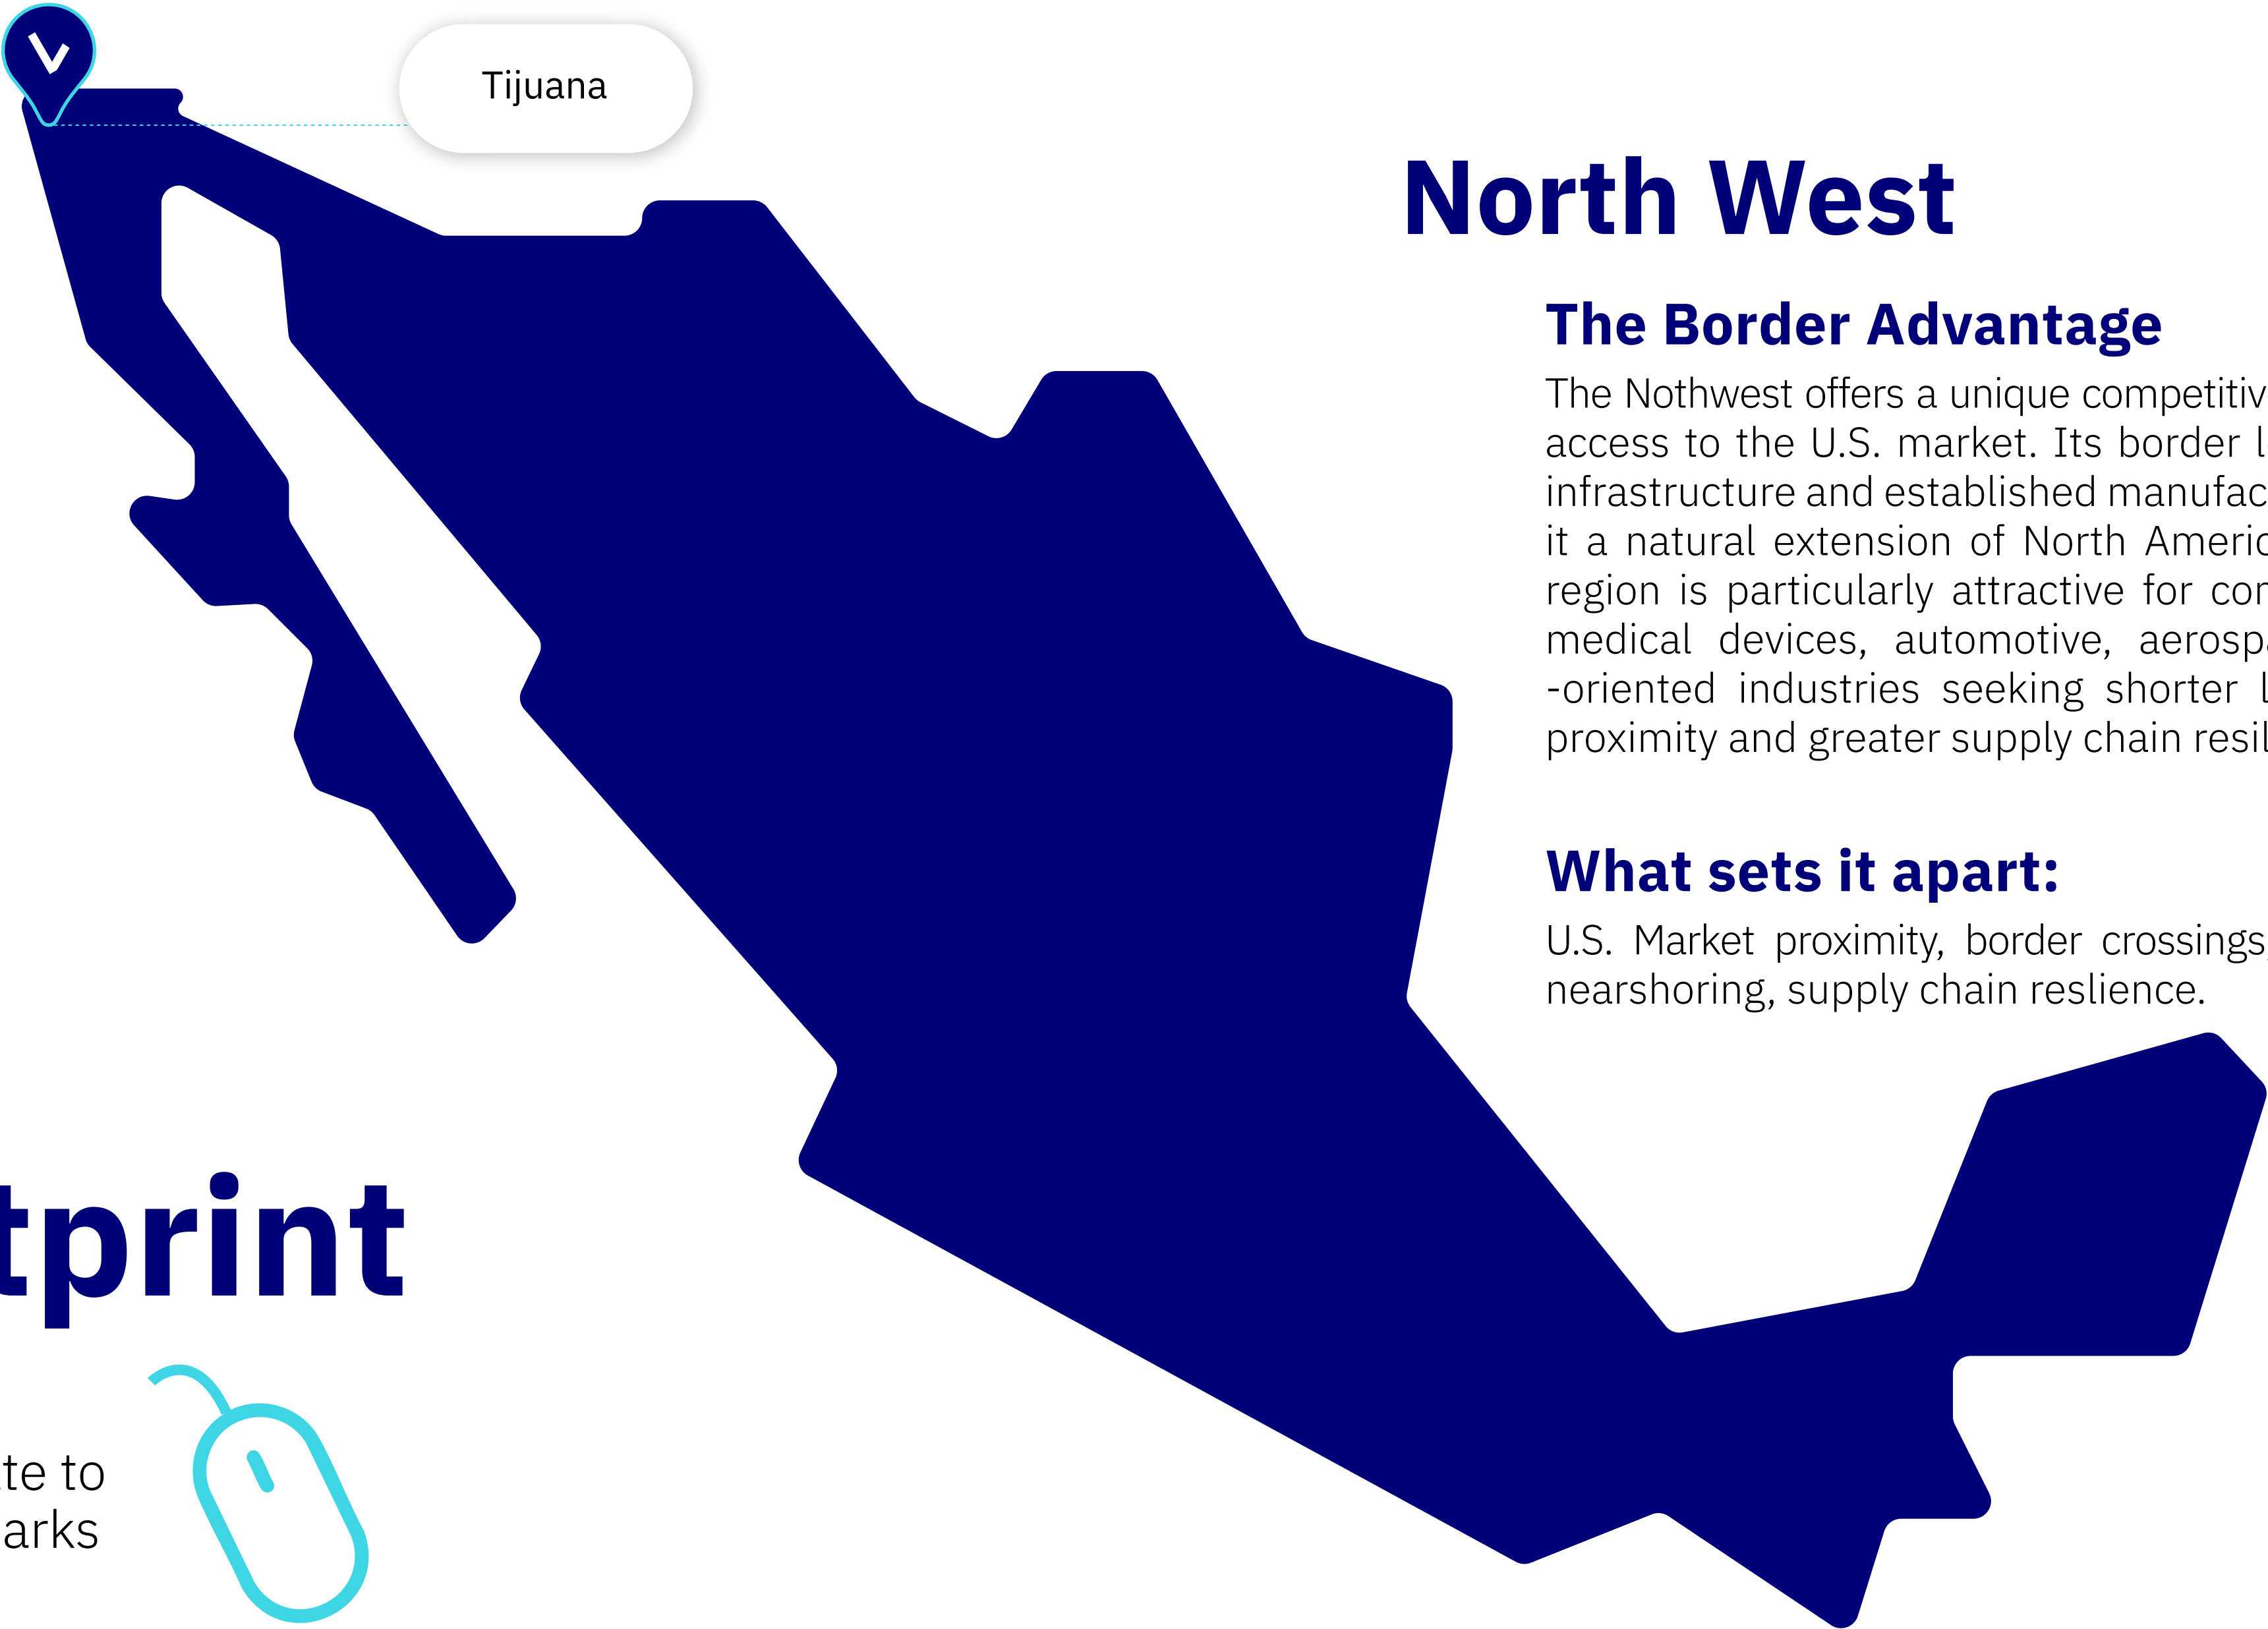

What sets it apart:

Engineering talent, technology, advanced manufacturing, R&D ecosystem, industrial diversification.

Our Footprint

Click on a state to explore our parks

North West

The Border Advantage

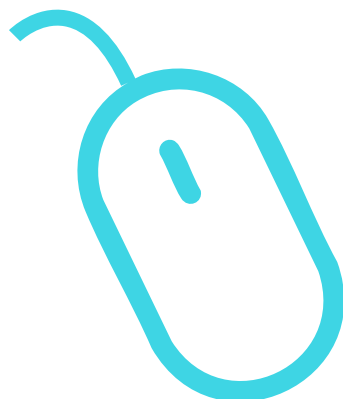

The Nothwest offers a unique competitive advantage: immediate access to the U.S. market. Its border location, mature export infrastructure and established manufacturing ecosystem make it a natural extension of North American supply chains. The region is particularly attractive for companies in electronics, medical devices, automotive, aerospace and other export -oriented industries seeking shorter lead times operational proximity and greater supply chain resilience.

What sets it apart:

U.S. Market proximity, border crossings, export manufacturing, nearshoring, supply chain resilience.

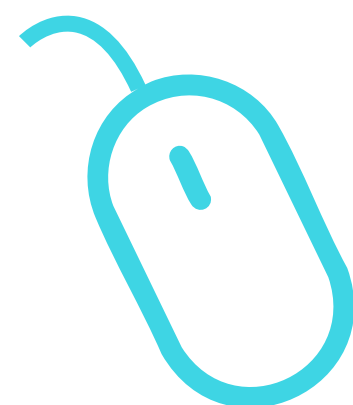

Our Footprint

North East

The Manufacturing Powerhouse

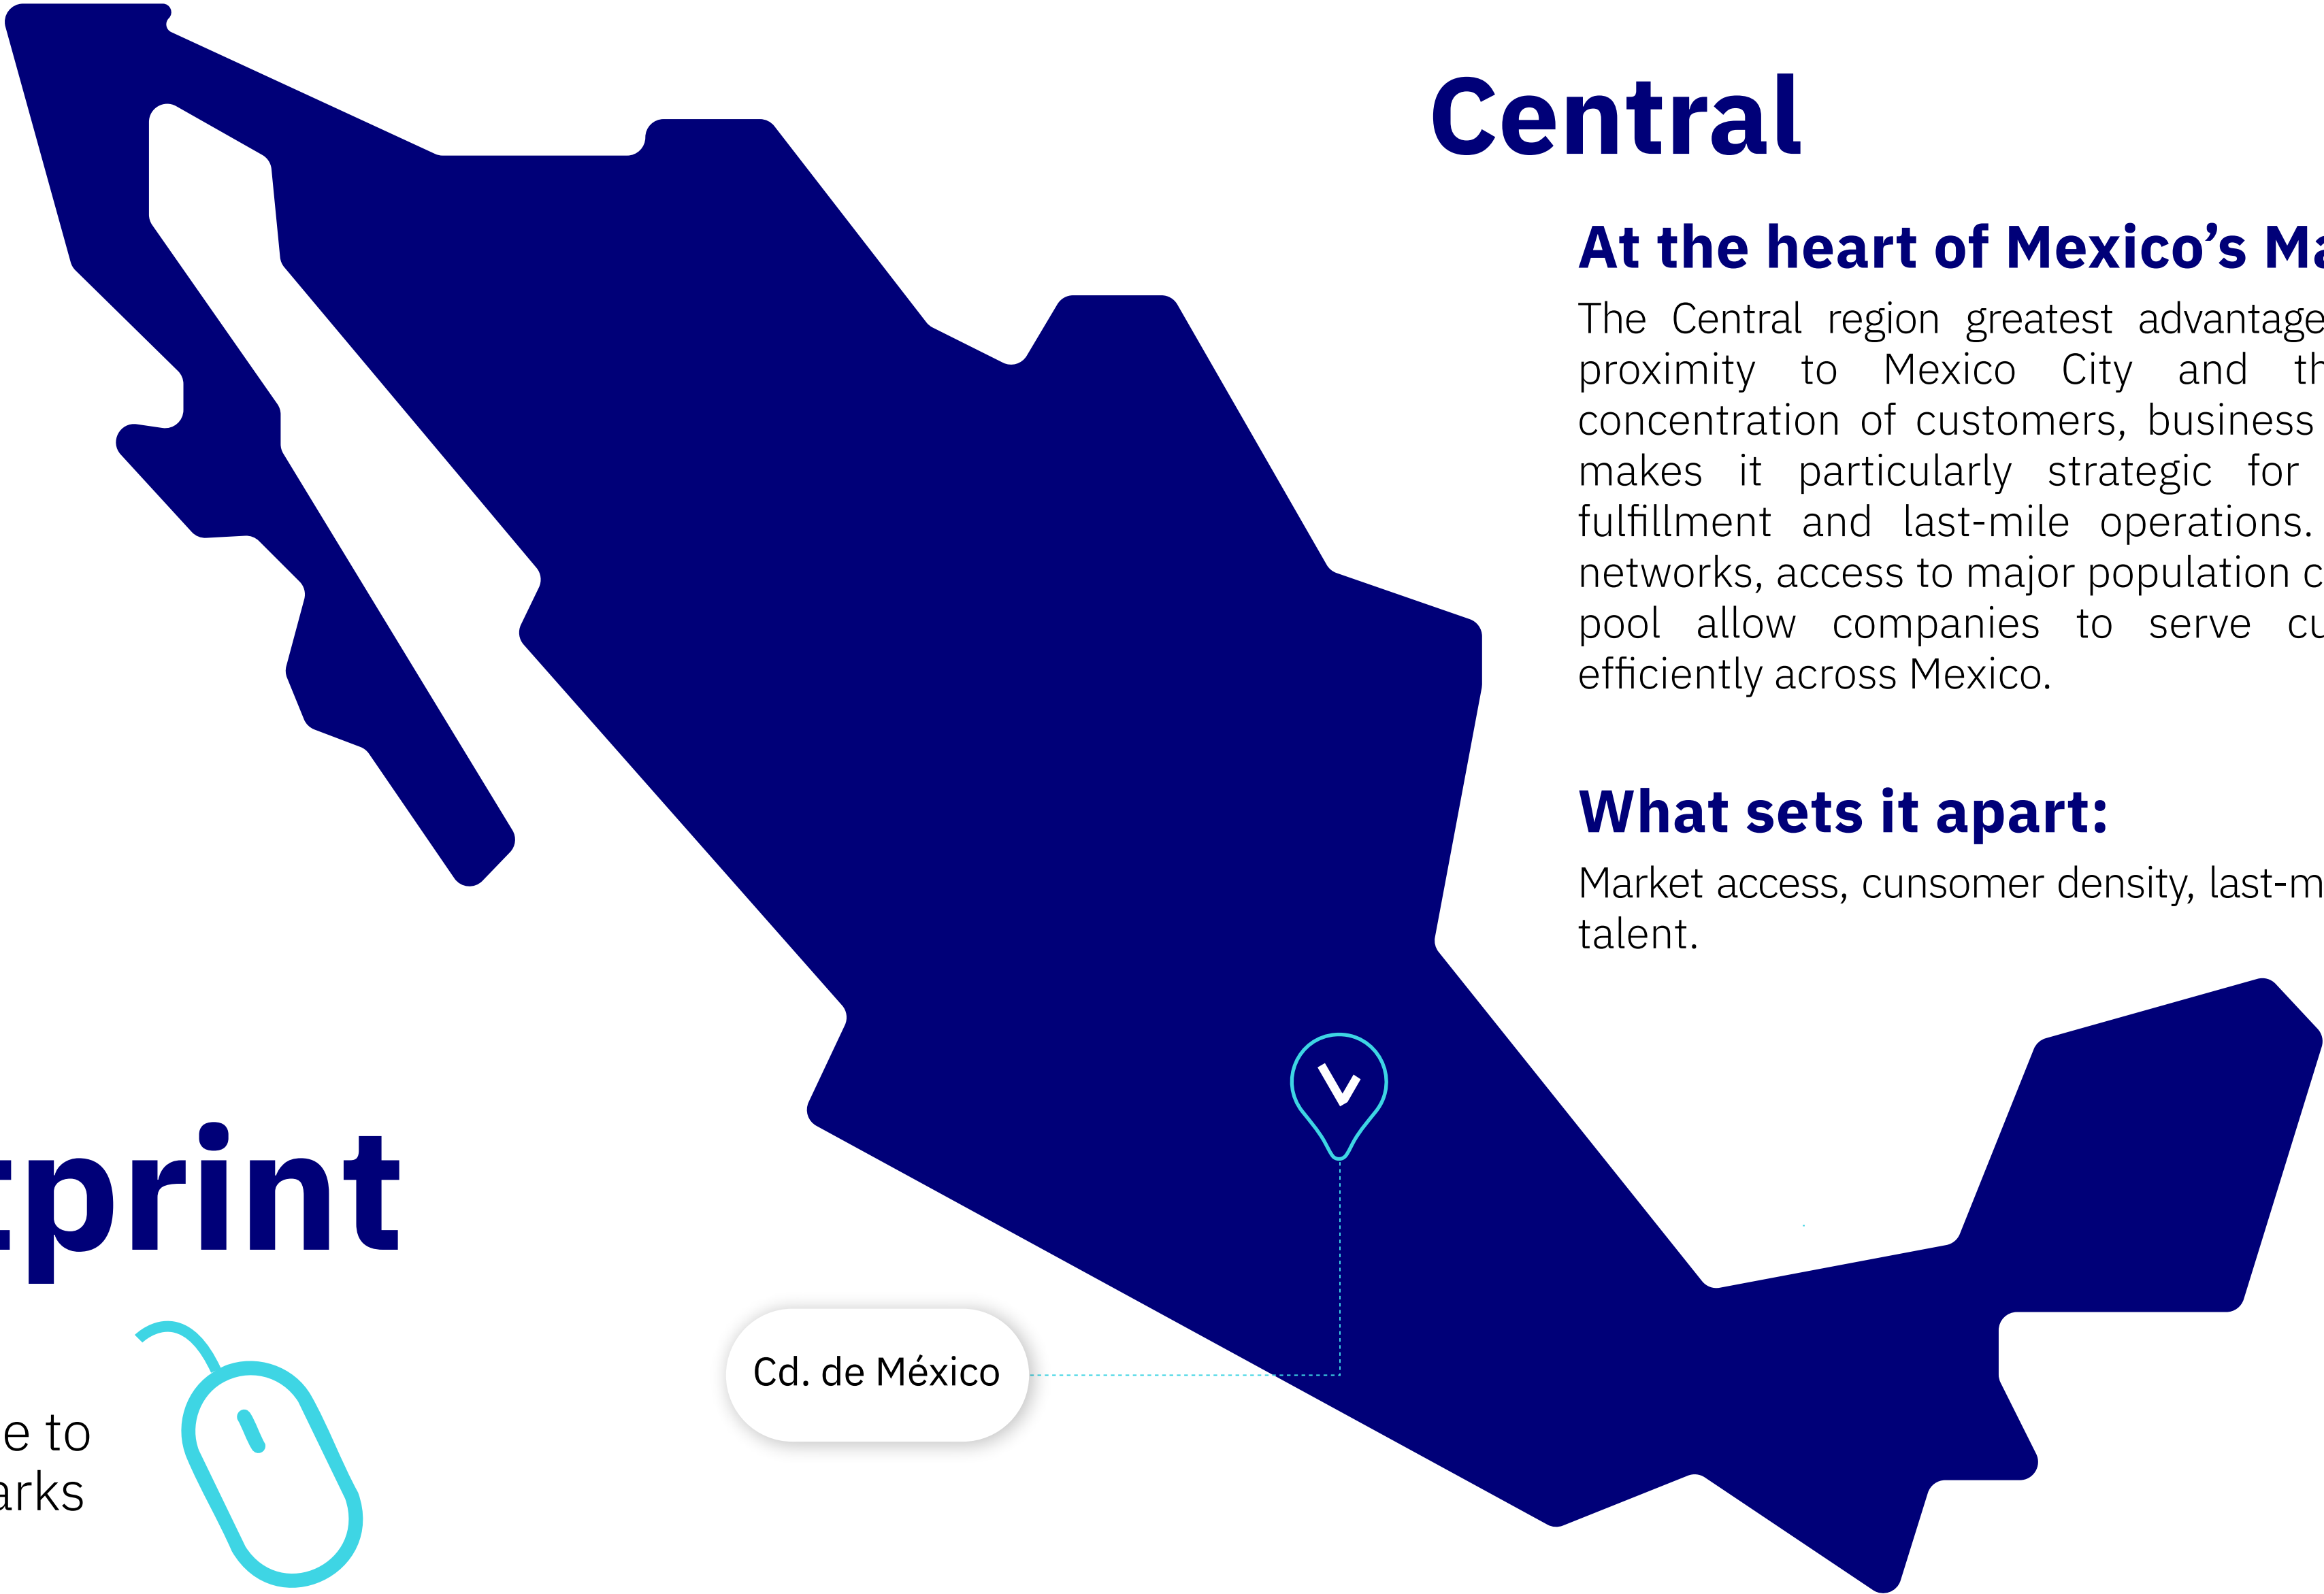

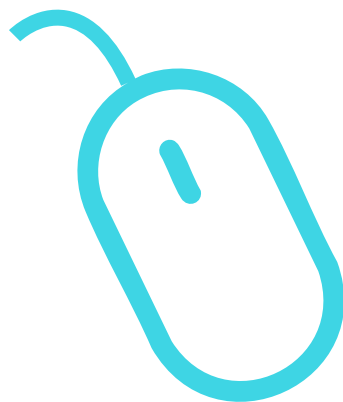

The Northeast stands out for the depth and maturity of its industrial ecosystem. With decades of manufacturing expertise, a strong supplier network and highly specialized technical talent, the region supports complex, high-value operations at scale. Its strong presence in automotive, metalworking, electrical and advanced manufacturing, combined with robust logistics infrastructure, creates an environment where companies can build, expand and integrate efficiently into North American production networks.

What sets it apart:

Industrial expertise, supplier ecosystem, specialized workforce, manufacturing scale, North American integration.

Our Footprint

Click on a state to explore our parks

Central

At the heart of Mexico’s Market

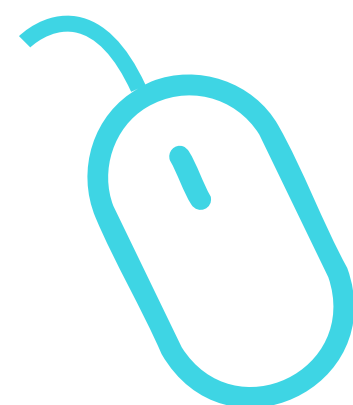

The Central region greatest advantage is market access. Its proximity to Mexico City and the country’s largest concentration of customers, business and economic activity makes it particularly strategic for logistics, distribution, fulfillment and last-mile operations. Dense transportation networks, access to major population centers an a large talent pool allow companies to serve customers quickly and efficiently across Mexico.

What sets it apart:

Market access, cunsomer density, last-mile logistics, distribution, talent.

Our Footprint

South Bajío

Built for Global Manufacturing

South Bajío is defined by its world-class industrial clusters and deep supplier networks. Querétaro and Guanajuato have developed highly integrated ecosystems serving automotive, aerospace, logistics and advanced manufacturing companies. This concentration of OEMs, Tier 1 suppliers, specialized talent and supporting services enables companies to establish operations within an existing industrial ecosystem and scale efficiently accessing Mexico's major domestic and export markets.

What sets it apart:

Industrial clusters, aerospace & automotive, supplier networks, specialized talent, global manufacturing.

Building a home with purpose: ESG

At Vesta, Environmental, Social and Governance (ESG) principles are not an add-on, they are embedded in everything we do and from the foundation of our business model. Our three ESG pillars are managed with equal priority through a comprehensive ESG Management System that guides our decisions, shapes our processes, and defines how we operate across every project, from developing industrial parks to acquiring new land.

On the social front, this commitment translates into close, meaningful engagement with local communities. Before developing or acquiring any site, we conduct in-depth social assessments to understand local contexts and foster healthy, trust-based relationships from the outset. When needed, we go further by investing in social initiatives that enhance quality of life, including educational programs and initiatives that support social and productive entrepreneurship.
