

## COMMITMENT LETTER TO THE PARIS AGREEMENT

At Corporación Inmobiliaria Vesta, we are aware of the key role that the business community must play in climate action and in protecting our planet.

With this in mind,

We pledge to:

- Reduce our carbon footprint and promote renewable energy throughout our portfolio.
- Establish long-term targets and processes to reduce our carbon footprint.
- Manage climate risks by identifying prevention, mitigation and remediation actions involving the most important areas of the company.

As part of this commitment, Vesta has made climate change the mainstream axis of all of the strategic actions to be taken within its Environmental, Social and Governance (ESG) strategy by 2025. By joining in this commitment, we align our goals with those of the Paris Agreement toward limiting global warming to 1.5°C.

A handwritten signature in blue ink, appearing to read "Laura".
