Adding Stabilized/Operating Metric

In order to improve transparency, as well as to enable comparison among peers, Vesta is adding new operating portfolio metrics. Vesta will report portfolio occupancy in terms of “same store” and “stabilized portfolio”. We will continue to report “total portfolio” occupancy for consistency purposes. Management believes that the new metrics are a useful indication of the performance of the company’s operating portfolio. These additional measures are intended to reflect REIT market practices.

Under the “stabilized portfolio” calculation, the measure will include properties that have reached 80% occupancy or that have been completed for at least one year, whichever occurs first.

Revising Same Store Metric

Vesta has updated its definition of same store occupancy. The updated definition is intended to reflect market practices and will assist the reader to compare Vesta’s performance against its public peers. In this methodology, the measure will include properties that are part of the “stabilized portfolio” for the entire period under comparison.

A Better Gauge: U.S. REITs report occupancy using three primary methods, 1. total portfolio occupancy, 2. operating (stabilized) portfolio occupancy, and 3. same store portfolio occupancy. Most U.S. REITs emphasize stabilized and same store portfolio metrics and provide separate and distinct disclosure on its development pipeline to draw clear distinctions between its operating portfolio and external growth initiatives.

Vesta's U.S. peers report normalized occupancy metrics that focus on their stabilized portfolios. For most REITs, the stabilized and same store portfolios hold the majority of their properties, therefore investors usually evaluate management's operating capabilities using these metrics.

Core Metric	Definition
Total Portfolio Occupancy	Percentage of occupied properties for the entire property portfolio. Includes development, redevelopment, stabilized, and properties held for sale.
Stabilized Portfolio Occupancy	Percentage of occupied properties for stabilized properties only. A property is generally considered stabilized once it has reached 80% occupancy or has been completed for more than one year, whichever occurs first.
Same Store Portfolio Occupancy	Percentage of occupied properties for properties that have been in the operating (stabilized) portfolio for the entirety of two comparable periods.

Same Property Breakdown

The pool of properties owned for more than a year - the general, albeit oft modified definition of "same-property" at most industrial REITs - represents the vast majority of value for most REITs. As a result, providing clear operational metrics for this group of properties can help investors - the ultimate owners of these properties - best understand their changing health.

Funds from Operations (FFO):

Funds From Operations, or FFO, is defined in accordance with standards established by the National Association of Real Estate Investment Trusts, or NAREIT, which defines FFO as: the total comprehensive gain/loss in the period minus the conversion effect of the foreign operations, the income tax, gain (loss) due to the revaluation of the investment properties, foreign exchange gain (loss), other income (expenses), interest income, depreciation of other assets and paid taxes in cash.

Net Operating Income:

Is calculated as: rental income minus the operating cost for the investment properties that generated income.

EBITDA:

Stands for rental revenue minus the operating cost of the investment properties minus the administrative costs. The rental cost and administrative cost does not include depreciation or amortization.

Build to Suit (BTS):

Means a build-to-suit building that is designed and constructed in a tailor-made manner in order to meet client-specific needs.

Inventory buildings:

Are buildings that are built in accordance with standard industry specifications, for the purpose of having sufficient space available for clients that do not have the time or interest to build a BTS Building.

Same-Property:

We define "same properties" as properties that were in our portfolio on January 1st, 2014.
